

Acid/LSD

Brief Description:

One of the strongest mood-changing drugs. It is sold as tablets, capsules, liquid, or on absorbent paper.

Street Names:

Acid, blotter, and many others.

Effects:

Unpredictable psychological effects. With large enough doses, users experience delusions and visual hallucinations. Physical effects include increased body temperature, heart rate, and blood pressure; sleeplessness; and loss of appetite.

Statistics and Trends:

In 2005, annual use among 12th graders was 1.8%. Among 10th graders, annual use was 1.5%. Source: NIDA Infofacts: High School and Youth Trends.
